

Commitment to Digital Accessibility

We are dedicated to ensuring our digital experience is as accessible as possible to everyone, including those with physical or cognitive impairments. To uphold our commitment, we aim to adhere to the Website Content Accessibility Guidelines (WCAG) 2.1, Level AA standards in the design, testing and development of our website. These standards are recognized as the international standard for making digital content more accessible.

Our website supports assistive technologies such as screen readers, magnifiers, and voice recognition software. It also features a tool to adjust colors, contrast, text formatting and more.

We are always seeking improvements in performance, speed, and accessibility. If you experience difficulty using this website or would like to report accessibility problems, request information in accessible formats or provide feedback, please get in touch using one of the contact methods on our Inquire page.
